Dear Ms. Henney:

This letter is to ask you to require that no new genetically-engineered foods or products with GE ingredients be released until the Food and Drug Administration requires long-term safety testing of all GE foods before they go to market. It also requests that all GE foods presently on the market be labeled, giving consumers the right to know what's in the food they are eating.

The long-term ramifications are so serious much more study needs to be done before GE ingredients change the way world agriculture is carried out.

Thank you.

Sincerely yours,

Patricia M. Churchman
